

Sandra has been a researcher in pollination ecology for over a decade, with a focus on understanding both basic and applied aspects of pollination. She worked on bumblebee pathogens during her PhD in Massachusetts, and followed that up with an postdoc in California. She has since studied pollinator conservation issues with Dr. Elizabeth Elle at Simon Fraser University. She is currently an Assistant Professor at the University of the Fraser Valley, where she is working to establish a research program that focuses on both pollinator conservation and agricultural challenges in the Lower Mainland.
