

Jungmin Lee's brief biography:

Since 2004, Jungmin has been the Research Food Technologist (Food Chemist) for the US Department of Agriculture's Agricultural Research Service Horticultural Crops Research Unit (USDA-ARS HCRU) in Corvallis, OR. The program currently focuses on enhancing phytochemicals within minimally processed foods, beverages, and dietary supplements.

Jungmin received degrees from Oregon State University, then began her career with USDA-ARS, first in Beltsville, MD as a Post-Doctoral Research Associate (Research Chemist), before joining the HCRU in Corvallis. Her lab is presently at a Parma, ID worksite, but it's expected to move to Corvallis sometime this year.
